USE OF BOVINE MATERIAL IN COSMETICS

1. At the last meeting of the Tyrrell Committee (BSE) it was agreed that DH should consider its advice to DTI last year in order that it could be reissued to trade organisations.
2. I would be grateful if you would look over the previous advice and suggest amendments as necessary. Reference will have to be made to BSE in France and Switzerland and the ingredients from bovines from these countries. We also need to delete the reference to "BSE in deer" as cases of SE in deer have not occurred.
3. Can I have a response by 31 July please.
